

B021 Videoscope

Quick visual inspections

BENEFITS IN PRACTICE:

Immediately ready for use – just switch it on and get started

Robust videoscope probe with fixed-focus lens and water-proof camera head (IP67 type of protection)

High-intensity quad LED illumination with dimmer

180° image rotation function

Bendable, inherently stable gooseneck probe

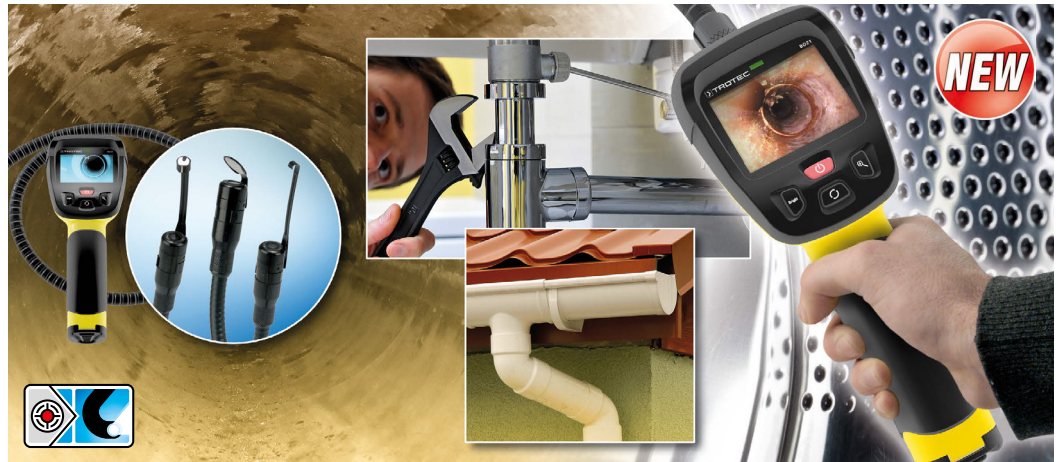

Mobile, battery-supplied operation

Automatic switch-off

Inclusive of side-view mirror, hook and magnet attachment

Optimum value-for-money ratio

Different exchangeable probes optionally available as accessories

The B021 is a universally applicable videoscope for quick endoscopic visual inspections in poorly accessible areas or hollows.

Integrated in the tip of the bendable gooseneck probe is a water-proof colour camera with adjustable illumination.

The powerful quad LED illumination of the easy-to-handle B021 enables perfectly illuminated inspection images in every situation, displayed on the colour LCD display of the B021 with excellent brilliance.

Thanks to the 180° image rotation function, inspection views in an almost upright position are possible even in areas full of nooks and crannies.

Technical data	B021 Videoscope
Article number	3.510.009.121
Probe	∅ 17 mm / length 1,000 mm
Focussing range	50 - 150 mm
Field of vision	68°
Type of illumination	Quad LED
Display (resolution)	2.4 inch LCD (480 x 234 pixels)
Zoom	2x
Operating temperature	-10 °C to +50 °C
Storage temperature	-10 °C to +50 °C
Functions	Brightness control, 180° image rotation function, automatic switch-off
Power supply	4 x LR6 AA 1.5 V
Weight	580 g

Scope of delivery
Measuring device incl. battery, side-view mirror, hook and magnet attachment, Getting started guide

Practical detail:

Auxiliary tools for both measuring devices are included in the scope of delivery which can be used to expand the B021's or the B026's range of applications, e.g. as recovery instrument for loose parts or for taking samples.
